

SYMPOSIUM sur les
MYCOTOXINES
Mieux gérer le risque,
du semis à la trémie

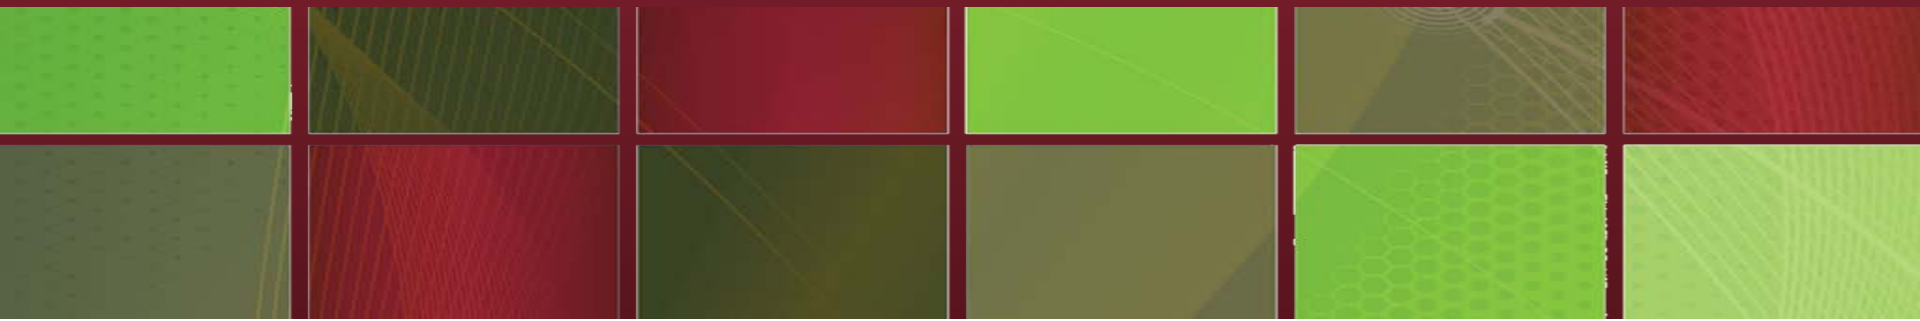

SYMPOSIUM on
MYCOTOXINS
Risk Management,
from Seed to Feed

Plenary session

Michel Vignola, agronome, M.Sc.
Nutreco Canada

Goals of the Organizing Committee

- **Follow-up to 2009 Mycotoxin Information Day**
- **Share novelties**
- **Present practical solutions:**
 - **Risk management**
 - **Help producers and advisors to:**
 - **Make the right actions**
 - **Make better choices**

A wider comittee and mandate

- **Important support from Swine Innovation Porc**
- **Supplementary resources**
- **Canada wide event and multi-provincial team/committee**
- **Still centered on plant and animal production:**
 - **Multidisciplinary**
 - **From seed to feed!**

Respective workshop topics

Nutrition and Animal Health

- **Impact of deoxynivalenol (DON) and additives on nutrient digestibility and DON metabolism (F. Guay)**
- **In vitro effects of DON on porcine reproductive and respiratory virus (PRRSV) and on porcine circovirus type-2 (PCV2)(Y. Chorfi)**
- **Effects of DON on intestinal immunity (M. Lessard)**
- **Mycotoxins in the poultry industry (T. Scott)**

Crop Management

- **Breeding and selection for FHB mitigation (A. Brûlé-Babel)**
- **Harvesting and storage (P. Johnson)**
- **How to reduce FHB and the presence of toxins in cereals? (A. Vanasse)**

- **Fundamental and paramount:**
 - Difficult topic: science, \$\$\$
- **Solutions through innovation:**
 - Getting off the beaten path, initiate change
 - Either through creativity or simply accepting scientific evidences
- **Benefits: productivity, quality and innocuity of products, public/consumer interests**

- **Collective responsibility**
- **Is the results of the actions from each and everyone of us in the production chain**
- **Actual Technology Transfer:**
 - **What will we really change in order the risks will better be managed tomorrow than today?**

Technology transfer: improve risk management by today...

- **Will be a success if for each one of us:**
 - One new idea/concept is accepted
 - One new principle/mechanism is understood
 - One agronomic, feeding or management practice is improved and implemented
 - One new professional contact is established
 - One person from our immediate surrounding has been positively influenced

- Question period
- All speakers are available!
